QUICKVISION
imaging software

Benefit from the latest
technological advances
in image processing
with total compatibility
and full service.

We don't just
SUPPLY you
with the products
We FUSE YOUR
PRACTICE into
a powerful network system!

QUICKVISION IMAGING SOFTWARE

High Performance

Enjoy all your digital radiography and panoramic advantages thanks to the Quickvision imaging functions – from diagnostic assistance to storage and communication tools.

User-friendly

Simple, straightforward icons indicate the functions in the Quickvision software, allowing you to easily control your diagnosis imaging workstation and take advantage of all the image processing capabilities: contrast enhancement, measurements, video-inversion, zoom, filters, pseudo-colors, pseudo-3D and much more.

Decisive advantages for you and your patients

Complete efficiency and optimum profitability. This technology not only contributes to a quicker, more reliable diagnosis, it also helps you to communicate with the patient by letting you illustrate your diagnosis directly on the screen, helping them to understand and accept it.

Two Modules

Includes intraoral camera images and Digital X-Ray images totally interfaced and on a clinical chart of the patient's mouth.

The intraoral portion allows input from digital cameras and all intraoral cameras.

The Digital X-Ray module allows input from scanners, sensors and some Digital Panoramic machines

Quickvision Quick Points

- Imaging is controlled using various enhancement tools.
- Cosmetic module for before and after shots.
- Implant module.
- Customizable mounts/templates.
- Multi-user licensing.
- Bridgeability to most practice management software.
- DICOM compatible-for image sharing with colleagues.
- Windows Vista compliant, WIN 98/2000/XP
- Integration for intra/extraoral cameras, digital sensors, panoramic machines and scanners.
